Hi Evonne,

Would you mind sending Rachel a copy of the response?

Thanks,

Cam

Subject: your email to the U.S. Environmental Protection Agency

Dear [REDACTED],

Thank you for your email to the U.S. Environmental Protection Agency. First of all, we are very sorry for the loss of your brother-in-law.

EPA scientists performed an independent evaluation of available data for glyphosate and found no risks of concern to human health from current uses of glyphosate. Glyphosate products can be safely used by following label directions. There are no risks to children or adults from currently registered uses. Further information about this may be found on our website at [www.epa.gov/ingredients-used-pesticide-products/glyphosate](http://www.epa.gov/ingredients-used-pesticide-products/glyphosate).

To clarify, EPA does not have any jurisdiction in Brazil. Our international office works in partnership with other countries such as Brazil based on memorandums of understanding and other bilateral agreements, but we do not have an EPA agency office in Brazil or any other independent nation. Any further inquiries would best be addressed to your local authorities.

We wish you consolation in this difficult time for your family.

Sincerely,  
EPA International Web Team

Dear EPA Representative:

Maybe what I am about to say does not pertain to the affairs of your department. However, I am trying to find out the right people to talk to about a tragedy that took place in Brazil.

One month ago tomorrow, my brother-in-law was killed in Sao Paulo (interior), Brazil after handling a bag of ROUNDUP from Monsanto manufacturing company. His death has been very hard and a tragedy to the family, since he dedicated his whole life to working in agriculture (his passion), and was very strong physically, but ended up dying suddenly after handling an empty bag of glyphosate pesticide which keeps entering the country.

I have come across an article within the website of a law firm in the United States stating that the pesticide Glyphosate C3 H8 NO5 P had been forbidden entry into the country of Brazil. However, it did and now my family is suffering due to this tremendous loss of their father and husband.

As the EPA agency office in Brazil, please help us to prevent tragedies such as this from happening again.

I am a Brazilian/American citizen working hard to make the world a better place for all creatures. Let's work together for that purpose. Please, please help us. Let's not allow that to happen again.

I have also contacted a TV station in Brazil and they are willing to do a report on this ROUNDUP unfortunate situation culminating with my brother-in-law's unnecessary death.

Thank you for your attention to this matter.
